Wirraminna Environmental Education Trust
Annual Report 2018

In 2017/2018 Wirraminna Environmental Education Trust focused on the construction of an extension to our Discovery and Learning Centre – named the ‘Sunshine Room’.

The extension provides a designated area for Wirraminna Volunteers to conduct Administration Duties, to offer a Research Library and storage for Archive Records. It will also help to further our Environmental Activities.

This room will also be used by West Hume Landcare and Petaurus Education Group Inc as an administration office.

The construction of the ‘Sunshine Room’ allows increase usage of the Discovery Centre by offering a place that can be used solely as a learning environment for visiting schools and for organisations to hold workshops.
